PREVENT SPAM, VIRUS, MALWARE AND HACKERS FROM ENTERING YOUR NETWORK

Security is key to any network

The cost of security breaches, downtime and data loss is unacceptable in this day and age. You need to be sure that your network is fully protected against any form of undesirable Internet traffic it might encounter.

Unified Threat Management

The Protector is a Unified Threat Management network security appliance, which comes pre-loaded with comprehensive security Protection Filters:

- Intrusion Prevention System with Zero Day Protection**
- Full Mail Archiving**
- Anti-Spam with Grey Listing**
- Anti-Phishing**
- Anti-Spyware**
- Anti-Virus & Anti-Worms**
- Anti-Instant Messaging**
- Anti-VoIP**
- Anti-Games & Anti-P2P**
- Content Filter with Web Filter**
- Web Proxy**
- Instant Messaging Recording**

Anti-Spam with Grey Listing

The revolutionary Anti-Spam Grey Listing functionality blocks between 75-85% of all spam before it enters the network. The rest of the spam that comes in, is then scanned by the latest customized SpamAssassin engine that detects it as spam and quarantines it.

Firewall

The Firewall prevents DoS, blocks Exploits, supports Dynamic DNS IP addresses and other features.

Content Filter with Web Filter

The Web Filter allows you to control all websites that are being visited on the network. You can choose to block from more than 62 categories such as adult, news, gambling, auction sites, blog sites and many more.

Highly Sophisticated Intrusion Prevention System with Zero Day Protection

The Intrusion Prevention System consists of more than 21 years of research. For maximum defence Zero Day Protection adds an extra shield to your network so it can protect against many new or unknown threats before the vulnerability is discovered. This provides true protection from exploits before they can be created and launched against your network.

Built-in Protection from Denial of Service Attacks

The Protector blocks Denial of Service attacks so that your systems are robust under heavy attacks.

Full Mail Archiver

All incoming and outgoing mail are automatically stored on a harddrive. The Mail Archiver can be accessed by the users at the Selfservice portal with the Appliance including Active Directory support for user authentication.
